

Naive model

$\rho = 0.04$

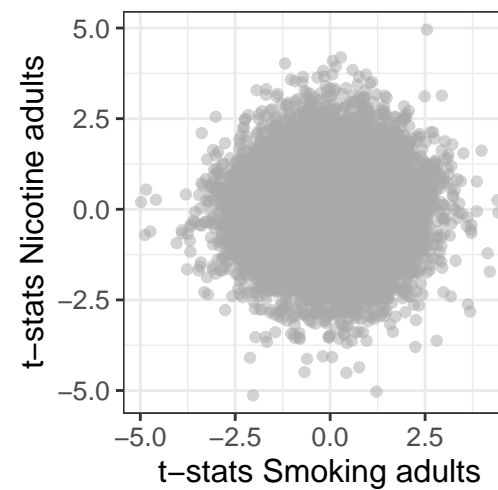

Differential expression

- sig Both
- sig Smoking adults
- sig Nicotine adults
- None

Fitted model

$\rho = 0.03$

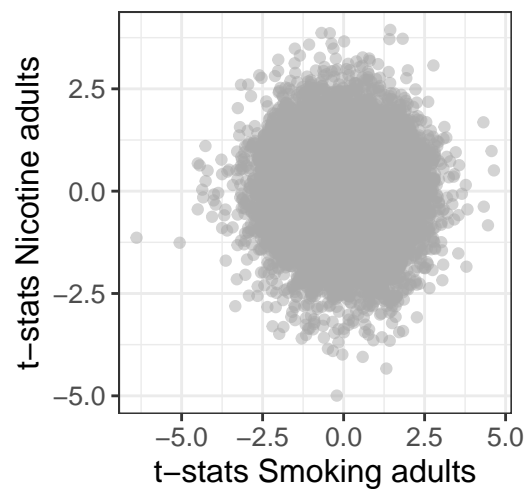

Differential expression

- sig Both
- sig Smoking adults
- sig Nicotine adults
- None

Interaction model

$\rho = -0.05$

Differential expression

- sig Both
- sig Smoking adults
- sig Nicotine adults
- None
