

## Nicotine mouse vs Smoking human

$\rho = -0.013$  ,  $p = 0.12$

### DE/Replication

Signif in both

● Replicating genes ( $p < 0.05$  in human,  $FDR < 0.05$  in mouse)

● Signif in mouse ( $FDR < 0.05$ )

● Signif in human ( $FDR < 0.1$ )

● ns genes
