

Naive model

$\rho = 0.042$  ,  $p = 2.6e-09$

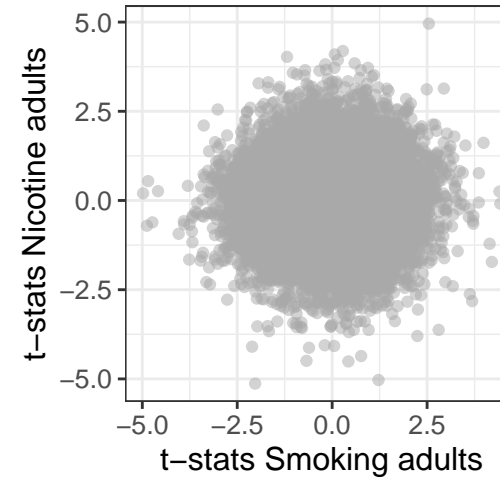

Differential expression

- sig Both
- sig Smoking adults
- sig Nicotine adults
- None

Fitted model

$\rho = 0.027$  ,  $p = 0.00017$

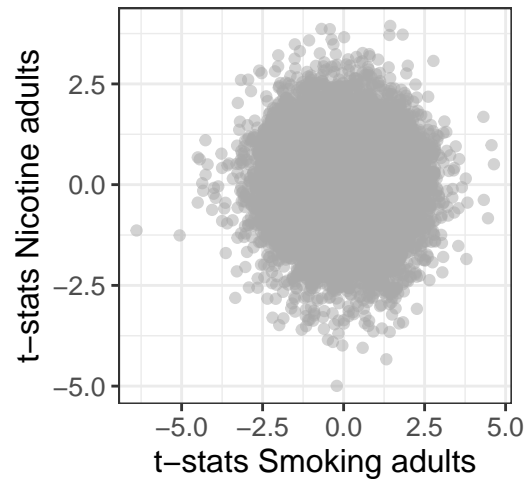

Differential expression

- sig Both
- sig Smoking adults
- sig Nicotine adults
- None

Interaction model

$\rho = -0.046$  ,  $p = 5.9e-11$

Differential expression

- sig Both
- sig Smoking adults
- sig Nicotine adults
- None
